

AccuKnox provides a Zero Trust Cloud Native Application Security (CNAPP) platform and delivers **Code to Run-time Security**. AccuKnox is the core contributor to Kubernetes Run-time security solution, KubeArmor®, CNCF (Cloud Native Computing Foundation) project with 700,000+ downloads. AccuKnox was developed in partnership with SRI (Stanford Research Institute) and is anchored on seminal inventions in the areas of Container Security, Anomaly Detection, and Data Provenance. AccuKnox is funded by leading CyberSecurity Investors www.accuknox.com

About Us

Key Facts

Employees: 65 **Sales Coverage:** Global **Capital Raised:** \$11M

Business, Technical Drivers

- Zero Trust Security
- Kubernetes Security
- Multi-cloud – Public Cloud Private Cloud
- Run-time Security
- Vulnerability Prioritization, Automation
- Drift Detection & Mitigation

Product, Solutions

- CNAPP (Cloud Native Application Protection Platform)
- CSPM – Cloud Security Posture Management – Static Security
- ASPM – Application Security Posture Mgmt. – DevSecOps
- CWPP – Cloud Workload Protection Platform – Run-time Security
- KIEM – Kubernetes Identity and Entitlement Management
- AskADA – GenAI based security co-pilot

Product

Use Cases

- Automated Approach to Zero Trust Cloud (Public, Private, Hybrid, Air-gapped) security
- Vulnerability Management & Prioritization
- Run-time security, Micro-segmentation
- Application Firewalling, Kernel Hardening
- Drift Detection & Audit Trail
- Continuous Diagnostics & Mitigation
- GRC – CIS, HIPAA, GDPR, SOC2, STIG, MITRE, NIST
- Securing Mission Critical Workload like Vault
- Securing AI workbench such as Jupyter Notebook

Key Differentiators

- In-line Security (as opposed to Post-attack security)
- Secures modern workloads (K8) and traditional workloads (Virtual Machines)
- Multi Cloud, Private, Air-gapped Cloud Security
- KIEM – Kubernetes Identity & Entitlement Management
- CDR – Cloud Detection and Response
- IAC – Infrastructure As Code scanning
- ASPM – Ability to do checks in CI pipeline such as DAST, SAST, SCA

Client Testimonials

Large US Integrator

“We performed an extensive analysis of comparable industry offerings and selected AccuKnox due to its support for public and private cloud and highly differentiated capabilities in the areas of Risk Prioritization, Drift Detection, and Advanced Compliance. Furthermore, we were very impressed with AccuKnox’s integration with leading Vulnerability Management platforms like Nessus.”

Large European Customer

“AccuKnox’s powerful combination of CSPM and CWPP; OpenSource foundations; In-line Zero Trust Security; Support for Public and Private Clouds; made them the ideal partner for us. Our client, a Large European CyberSecurity agency, was looking for a Zero Trust Security Solution that supports Private Cloud platforms. Our win is a clear testament to the value our clients see in this partnership. We look forward to many more successes ahead.”
