

API Security Issues

- 1. Zero Visibility**
Blind spots in internal, external, and shadow API traffic.
- 2. Critical API Risks**
Unchecked **ZOMBIE, ORPHAN, and SHADOW** APIs leaving backdoors open.
- 3. Data Leakage**
Sensitive PII/PHI exposure in headers and payloads.
- 4. Weak Segmentation**
Flat networks allow unrestricted North-South & East-West movement.
- 5. Compliance Failures**
Gaps in GDPR HIPAA, PCI-DSS, DORA, and OWASP coverage.

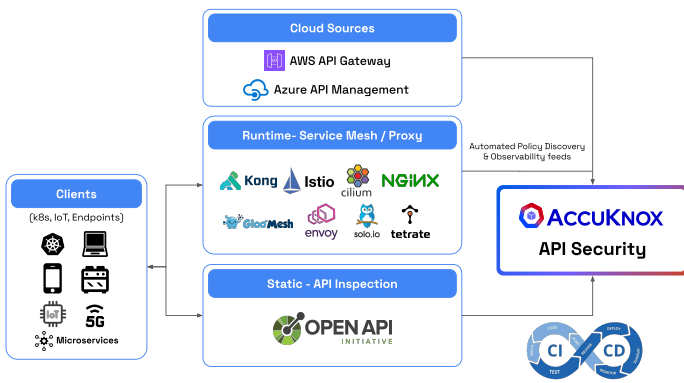

AccuKnox APISec Support Matrix

AccuKnox eliminates blind spots by securing APIs across discovery, behavior, access, and runtime threats.

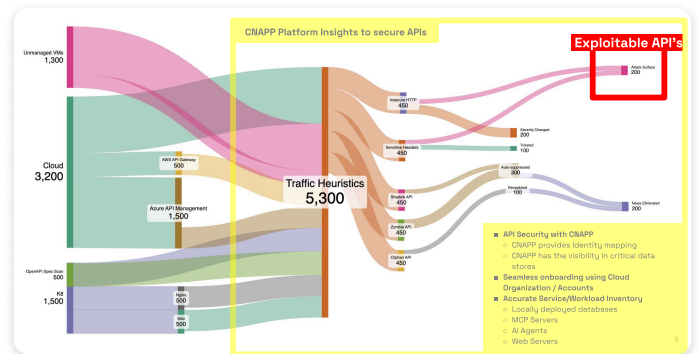

APISec Architecture

Unified detection covering **shadow, zombie, and orphan APIs**. Combines runtime visibility via service mesh/proxy, static inspection, and cloud integrations.

Too Many Alerts Hide Exploitable APIs

Deep identity mapping across workloads with integrated visibility into critical data stores. Highlighting exploitable APIs from the noise.

API Security Use Cases & Capabilities

- API Inventory & Classification
- Sensitive Data Detection
- Traffic Capture & Inspection
- OWASP Threat Protection
- Static API Scanning
- API Spec Generation
- Rate Limiting & Throttling
- Compliance Reporting

Differentiated APISec Offerings

- CNAPP-Driven Security**
Deep identity mapping across workloads with integrated visibility into data stores.
- Broad Visibility Model**
Multi-vector telemetry: process, file, network, and API.
- Deployment Flexibility**
Works in K8s, non-K8s, On-prem, Air-gapped, and Hybrid clouds.
- Accurate Inventory**
Includes locally deployed DBs, AI agents, and web servers.

Customer & Analyst Reviews

PRUDENTIAL

“At Prudent, we advocate for a comprehensive end-to-end methodology in application and cloud security. AccuKnox excelled in all areas in our in depth evaluation.”

Manoj Kern, CIO

IDT CORPORATION

“Choosing AccuKnox was driven by opensource KubeArmor’s novel use of eBPF and LSM technologies, delivering runtime security”

Golan Ben-Oni, CIO

About AccuKnox

AccuKnox is a Zero Trust CNAPP Cloud Security protects API Security, CDR, SIEM, Public clouds, Private clouds, Kubernetes, VMs, Bare metals, IoT Edge, and 5G security.
