### Myanmar Fleet Management Leader Selects AccuKnox SIEM to Replace Legacy Tools

Yoma Fleet, a fleet management and leasing company in Myanmar and part of Singapore-listed Yoma Strategic Holdings Ltd, has selected AccuKnox SIEM to replace its Wazuh-based solution with a more unified security platform.

## Announcements

### Next-Gen Data Security Posture Management Coming Soon

We're excited to announce that AccuKnox DSPM is coming soon, designed to help organisations discover, classify, and protect sensitive data across public, private, and hybrid clouds.

This upcoming release marks a major milestone in expanding our unified platform, extending security across AI, applications, cloud infrastructure, and now data. With DSPM market adoption [projected to surge past 20% in 2026](#) (up from less than 1% in 2022), organisations are prioritising platforms that consolidate multiple security tools into comprehensive solutions.

## Industry News

Cyberworld headlines, stay informed

### TeamPCP Turns Cloud Misconfigurations Into a Scalable Crime Engine

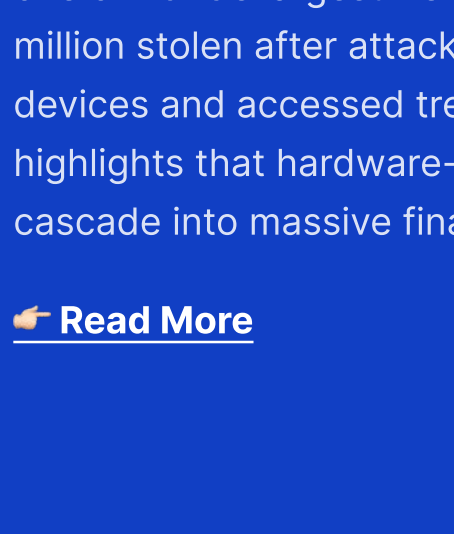

A new massive cloud exploitation campaign by threat group TeamPCP leverages misconfigured cloud infrastructure to automate intrusion and lateral movement at scale. This campaign shows how simple misconfigurations are being weaponised into self-propagating attack platforms.

### Cyber Recap: AI Malware, DDoS & Emerging Exploit Trends

This week's global security overview highlights a spike in AI-assisted malware, record-setting DDoS attacks, critical zero-day flaws, and supply chain compromise activity. The key takeaway for defenders? Exposure is growing faster than visibility.

### SolarWinds: Web Help Desk Exploited for RCE & Lateral Movement

Researchers link recent attacks on SolarWinds Web Help Desk to remote code execution (RCE) vulnerabilities that enable lateral movement and domain compromise. This multi-stage exploitation underscores the persistent risk in widely deployed infrastructure tools.

### \$40M DeFi Breach With Endpoint Risk

Decentralized finance platform Step Finance suffered one of 2026's largest DeFi hacks — roughly \$40 million stolen after attackers compromised executive devices and accessed treasury keys. The incident highlights that hardware-level compromises can cascade into massive financial losses.
